undergraduate mathematical biology class. Chapters 2–11 and 16 are appropriate for an introductory graduate class on mathematical epidemiology. Chapters 16–15 are more advanced and are appropriate for a PDE-focused graduate mathematical biology class. Maia Martcheva An Introduction to Mathematical Epidemiology The first contributions to modern mathematical epidemiology are due to P.D. En'ko between 1873 and 1894 (En'ko, 1889), and the foundations of the entire approach to epidemiology based on compartmental models were laid by public health physicians such as Sir R.A. Ross, W.H. Hamer, A.G. McKendrick, and W.O. Kermack between 1900 and 1935, along with important
