Chapter 5. ... ligaments - bone to bone tendons - muscle to bone. Which of the four major tissue types is blood considered to be? connective tissue. What are the 2 main components of blood? Tissues Study Guide Flashcards | Quizlet Although bone cells compose a small amount of the bone volume, they are crucial to the function of bones. Four types of cells are found within bone tissue:

osteoblasts, osteocytes, osteogenic cells, and osteoclasts (Figure 5).

Figure 5. 6.3 Bone Structure -

Anatomy and Physiology Long

bones are longer than they are

wide. The length of the bone, or

shaft, widens at the extremities

(ends). Short bones are cubelike,

about as long as they are wide. Flat

bones, such as ribs or skull bones,

are thin or flattened. Irregular

bones, such as vertebrae, facial

bones, or hip bones, have specific

shapes, unlike the other types of

bones.

How to Open the Free eBooks. If you're downloading a free ebook directly from Amazon for the Kindle, or Barnes & Noble for the Nook, these books will automatically be put on your e-reader or e-reader app wirelessly. Just log in to the

same account used to purchase the book.
