STANDARDS BOARD DENSITY ... The

Commodity Classification Standards
Board (CCSB) has recently invoked
new freight density changes that
took full effect on Aug. 5th, 2017.

These freight density changes will
bring an immediate impact to how
some products are now packaged,
along with additional costs to
shippers – particularly those
shipping freight via less than
truckload (LTL). Commodity

BOARD DENSITY ... The Commodity Classification Standards Board

(CCSB) is an autonomous board of not less than three or more than seven members, composed of full-time employees of NMFTA, and such other persons as may be deemed necessary to conduct the affairs of the CCSB. One member of the CCSB serves as Chairman, and another as Vice Chairman. National Motor Freight Traffic

Association New NMFC 29785;

Boxes or Cartons, fiberboard or paperboard, with or without components of other materials: 11 density range classes (60 through 400). The following items will be canceled and replaced with NMFC 29785: 28920, 29205, 29240, 29250, 29285, 29400. NMFC

Changes Effective August 15, 2020 On December 5, 2019, the Commodity Classification Standards Board (CCSB) posted amendments to the National Motor Freight Classification (NMFC) class codes. These amendments will go in effect on January 4, 2020. See Full List of Classification Changes. Some of the commodities that will be impacted include: NMFC Changes Scheduled for January 4, 2020 - Ascent Global ... The Commodity Classification Standards Board (CCSB) assigns classifications 70, 92.5, 175 and 400 to freight with densities of 15, 10.5, 5, and 1 pound per cubic foot, respectively. Freight less dense than 1 pound per cubic foot is classified as 500. The density is the space the item occupies in relation to its weight. Calculate Freight

Class | How To Guide & Freight Density ... Pricing Options with Density Based Costing: Minimum density required for shipments. Dimensional Weight, rate at calculated weight for the agreed minimum density or the actual weight, whichever is greater. Straight density, assign rate or class based on density of shipment. In Comparison: Classification vs. Density Based Costing The Commodity Classification Standards Board, or CCSB, samples numerous shipments for both the pcf density and the frequency of that particular density being shipped. For example, night lights packaged in boxes range in density between 2.17 to 22.50 pcf, with an average density of 7.09 pcf according to CCSB

research. Ultimate Freight Guide - uShip With singleface corrugated high density polyethylene board, having a density of 120 pounds per 1,000 square feet (MSF) with a total thickness of 4.1 millimeters. NOTICE OF DISPOSITION - DOCKET

2019-1 CCSB density guidelines assign classification 50 to freight that weighs 50 pounds per cubic foot. CCSB assigns classifications 70, 92.5, 175 and 400 to freight with densities of 15, 10.5, 5, and 1 pound per cubic foot, respectively. Freight less dense than 1 pound per cubic foot is classified as 500. An Introduction to Freight Classifications - HNM Global ... The Commodity Classification Standards Board (CCSB) will be changing the standard for any density based freight class shipping LTL. The

changes will affect articles having a density between 4 and 6 pounds per cubic foot and any item previously on a 9-sub-provision scale. Upcoming NMFC Density Changes - InterChez The National Motor Freight Classification (NMFC) system is a standardized classification method designed to give LTL shippers a uniform pricing structure. Each type of product is assigned a NMFC code, using 18 freight classes between 50 and 500. The codes exist to prevent incorrect classification and keep freight costs as fair and low as possible. Freight Class Calculator and FAQ- Zipline Logistics As seen in spreadsheet "2016_3_S02_Spreadsheet" and the analysis "2016_3_S02_Analysis", the density variation goes from 0.41 to 136.44. Sorting and filtering

the spreadsheet, the data shows 78.25% of shipment falls under a density of 10. Initially, classifying at 110 seems to make sense since majority of the density is under 10. Commodity Classification
