planning, deploying, securing, monitoring, automating, and virtualizing an enterprise server infrastructure. Exam 70-413:

Designing and Implementing a Server ... Providing a stable

environment for your developers is another important consideration when designing an infrastructure.

As mentioned previously, one way to implement a development environment is to share the staging server resources—for example, setting up separate development virtual hosts and databases on the same servers used for staging. 7.

Infrastructure Design and Planning -

High Performance ... The first step in designing a database is deciding which aspects of the system are important enough to include in the model. Treat each aspect as an
