## Kamailio Configuration

Guide Kamailio configuration file is not just a set of 'parameter=value' line. It has active components for runtime, named routing blocks. A routing block is a group of actions that specify what should be done for each SIP message. The actions are exported by Kamailio core or modules and are like functions exported by a library. tutorials:getting-started:main [Kamailio SIP Server Wiki] Kamailio Documentation Project developers do the best to provide good and up-to-date documentation. However, as time is an important and limited resource, we welcome all of you to contribute. Kamailio Documentation – The Kamailio SIP Server

Kamailio Configuration Guide

Kamailio configuration file is not just a set of 'parameter=value' line. It has active components for runtime, named routing blocks.

Kamailio Configuration Guide - laplume.info

The configuration for each server consists of minimum two files:

- kamailio.cfg - the main configuration-file (general for each entity)
- pcscf.cfg / icscf.cfg / scscf.cfg - individual configurations for the P-/I-/S-CSCF (everything, that's individual per server)
