JTAG interface, using In System Programming (ISP) and UART0, or by means of In Application Programming (IAP) capabilities. The application program, using the IAP UM10139 LPC214x User manual LPC2148 has an inbuilt 10-bit Successive Approximation ADC which is multiplexed among 6/8 input pins of ADC0/ADC1. The ADC reference voltage is measured across GND to VREF, meaning it can do the conversion within this range. Usually, the VREF is connected to VDD. As LPC2148 works on 3.3 volts, this will be the ADC reference voltage.
