Overview. Code of Practice for the Management and Control of ... Control is a function of management which helps to check errors in order to take corrective actions. This is done to minimize deviation from standards and ensure that the stated goals of the organization are achieved in a desired manner.

According to modern concepts, control is a foreseeing action; earlier concepts of control were only used when errors were detected. Control in management includes setting standards, measuring actual performance and taking corrective action In decision making. Control

(management) - Wikipedia As stated above, control is one of the functions of management. In this context, it refers to the process of analysis and corrective action. When controlling, you are essentially monitoring whether you are receiving an expected result of a process (or during it) or if the outcome deviates from the expectation.
